

Deven Joshi

Independent Non-Executive Director | Strategic AI Governance & Technology Advisor

 idevenjoshi@gmail.com |  : 407-474-6124 | [LinkedIn](#)

Deven Joshi is an accomplished enterprise AI and digital transformation executive with over 25 years of experience providing strategic direction, risk oversight, and fiduciary stewardship to Fortune 100 corporations, federal agencies, and highly regulated organizations. Operating at the intersection of emerging technology and fiduciary responsibility, he brings precise independent judgment, enterprise scaling acumen, and providing independent, data-driven stewardship to ensure long-term value creation while safeguarding long-term shareholder value.

Strategic Oversight & Advisory Experience - Currently serving as the Chief AI Officer at C5MI, Deven establishes the enterprise-wide AI operating models, data strategies, and technology roadmaps that move organizations safely from technical experimentation to robust, production-scale adoption. Throughout his career, he has served as a trusted advisor to C-suite/Board leaders and executive teams at premier global technology organizations, including Google, AWS, and SAP. In these capacities, he has played a pivotal role in evaluating technology investment priorities, advising on strategic ecosystems, and translating complex technical capabilities into measurable business outcomes and sustainable competitive advantages.

Board Governance & Enterprise Risk Oversight - A core pillar of Deven's qualification for board service is his deep foundation in financial, operational, and technology risk management, built during his tenure within Deloitte's Audit, Advisory & Tax practices. He specializes in establishing robust governance frameworks for highly regulated environments—such as healthcare, life sciences, defense, and public sectors—where technical failure carries severe compliance and operational consequences. Deven provides sophisticated oversight on:

- **Responsible AI Adoption:** Designing ethical and operational governance frameworks to mitigate bias, ensure transparency, and manage model drift.
- **Cybersecurity & Privacy:** Evaluating data protection strategies, cloud infrastructure security, and regulatory compliance standards.
- **Technology Risk Mitigation:** Assessing the systemic risks of enterprise digital transformation initiatives and large-scale data platforms.

Independent Director Perspective & Credentials - Deven blends a highly collaborative board presence with the distinct ability to challenge executive management constructively. Brings a disciplined, objective perspective to the boardroom, balancing robust oversight of strategic risks with a collaborative, constructive approach to challenging management and executive succession. Grounded in objective, data-driven judgment, his perspective ensures that corporate strategies, executive succession planning, and innovation investments remain tightly aligned with organizational objectives and strict fiduciary standards. He holds an active U.S. Department of Defense Top Secret clearance, reflecting the highest level of trust, ethical standards, and commitment to responsible stewardship.

Education - B.S. in Mechanical Engineering, New Jersey Institute of Technology
