

DEVEN JOSHI

Independent Board Director

AI Governance | Enterprise Technology | Digital Transformation | Strategic Growth
Orlando, Florida • (407) 474-6124 • idevenjoshi@gmail.com

BOARDROOM PERSPECTIVE

A governance approach grounded in disciplined oversight, responsible innovation, and a clear understanding of enterprise scale operational realities.

Governance Philosophy

My governance philosophy is anchored in a "governance-before-growth" mindset. In high stakes, highly regulated industries, effective board service requires balancing strategic ambition with rigorous oversight.

I believe the Board's primary responsibility is to serve as an objective steward of long-term enterprise value, ensuring that management's drive for innovation is balanced by disciplined risk management, ethical accountability, and a clear understanding of enterprise scale operational realities.

I approach governance as a constructive partnership: challenging assumptions, fostering informed decision making, and maintaining a steadfast commitment to fiduciary duty and regulatory integrity.

Board Perspective & Committee Readiness

I am prepared to contribute to Board deliberations where oversight requires deep technical and operational fluency. My background as a Chief AI Officer and strategic advisor allows me to provide informed perspective in areas increasingly critical to modern Boards.

TECHNOLOGY & CYBERSECURITY

AI strategy • Cloud modernization • Enterprise risk • Data governance

Evaluate technology roadmaps, oversee data governance frameworks, and help ensure cyber security considerations are integrated into enterprise strategy.

RISK & AUDIT

Regulatory compliance • Operational resilience • Complex risk

Apply experience across defense and public-sector environments to inform oversight of regulatory and operational risk.

STRATEGY & INNOVATION

Capital allocation • Technology investment • AI scale

Provide an independent lens on long-term technology investments and the transition from AI experimentation to production-scale adoption.

Strategic Value Proposition

As an Independent Director, I offer a combination of boardroom ready governance perspective and hands on executive leadership. My experience includes building and managing AI operating models, governance frameworks, and data strategies that connect complex technology transformation with measurable business outcomes.

Board Contribution Framework

The perspective I bring to Board deliberations is shaped by experience at the intersection of technology, enterprise transformation, regulated environments, and executive decision-making.

RESPONSIBLE INNOVATION	Balance technological opportunity with governance, ethical accountability, security, and enterprise risk.
ENTERPRISE TRANSFORMATION	Connect technology strategy with operational realities, organizational capability, and measurable business outcomes.
EXECUTIVE ADVISORY	Translate complex technical issues into decision-ready perspectives for senior leaders and Board stakeholders.
LONG TERM STEWARDSHIP	Maintain focus on resilience, sustainable performance, regulatory integrity, and stakeholder value.

Board-Level Perspective

My experience across AI, digital transformation, enterprise technology, and highly regulated environments has reinforced the importance of viewing technology decisions through a broader organizational lens.

Effective oversight requires understanding not only what technology can do, but how its adoption affects risk, people, operating models, regulatory obligations, and the organization’s ability to deliver on its mission.

I bring that practical perspective to the Boardroom: the ability to engage deeply on complex technology matters while keeping the conversation anchored in enterprise priorities and accountable decision making.

Committee Alignment

Technology & Cybersecurity	Risk & Audit	Strategy & Innovation
AI strategy Cloud modernization Data governance Cyber resilience	Regulatory compliance Operational resilience Enterprise risk	Capital allocation Technology investment AI scale & adoption

Closing Perspective

Deven Joshi brings a practical, enterprise level perspective to Board deliberations, combining executive experience in technology transformation with an understanding of the governance, risk, and operational considerations that shape sustainable organizational performance.
