EXECUTIVE LEADERSHIP PROFILE

Technology and business leadership shaped by mission critical environments, enterprise transformation, and responsible AI adoption.

Executive Journey

My leadership journey has been shaped by complex, mission critical environments. My early service in the U.S. Army established a foundation in operational continuity, disciplined execution, and the practical realities of large scale systems.

That foundation carried into roles with Deloitte, Google, AWS, SAP, and other enterprise technology environments, where I advised Fortune 100 and public sector organizations on transformation, cloud, analytics, ERP, and digital strategy. Across these settings, I have worked at the point where technical decisions meet business priorities, organizational change, and executive accountability.

Today, as Chief AI Officer at C5MI, I lead AI strategy and implementation, with a focus on moving intelligent technologies from experimentation toward practical enterprise use.

Leadership Philosophy

I believe effective executive leadership begins with strategic clarity and is sustained through accountable execution. My approach emphasizes transparency, evidence-based decision making, and cross functional teams aligned around a shared purpose.

I place particular value on connecting people who view an issue from different perspectives engineering teams, government organizations, business leaders, C-suite executives, and strategic partners. That alignment helps ensure technology investments are understood in the context of business objectives rather than treated as isolated technical initiatives.

I also believe leaders must remain accountable for the practical and ethical consequences of their decisions. Healthy debate, inclusion, and disciplined follow through create the conditions for resilient organizations and durable results.

Enterprise Leadership Perspective

Years spent leading and advising organizations across AI, digital transformation, enterprise technology, and regulated environments have shaped three perspectives that inform how I approach executive decision making.

FROM EXPERIMENTATION TO SCALE

I have helped organizations move beyond AI pilots toward enterprise adoption. The challenge is not solely technical; it involves operating models, culture, change management, governance, and the ability to translate investment into practical business value.

RESPONSIBLE AI IN REGULATED ENVIRONMENTS

Experience in healthcare, defense, and other regulated settings has reinforced the importance of applying technology with appropriate attention to human impact, security, accountability, and responsible use. Responsible AI supports sustainable adoption rather than limiting innovation.

TRANSFORMATION THROUGH A BUSINESS LENS

Whether working on federal cloud modernization or enterprise supply chain and analytics initiatives, I evaluate technology in terms of business outcomes operational performance, cost, scalability, resilience, and long-term risk.

Selected Leadership Evidence

C5MI CHIEF AI OFFICER 2026–PRESENT	Leads AI strategy and innovation initiatives, including the company’s “10X” mission, AI-enabled enterprise workflows, productization efforts, and AI governance and security work with research partners.
GOOGLE PUBLIC SECTOR CUSTOMER ENGINEER, AI, SAP & ERP 2025–2026	Co-led a two-year pursuit associated with a \$50 million Defense Logistics Agency opportunity and supported strategic pursuits across major Department of Defense organizations.
GOOGLE CLOUD CUSTOMER ENGINEER, SAP 2021–2025	Advised enterprise and public sector clients on SAP, analytics, AI and cloud transformation; led partner ecosystem and go-to-market initiatives and executive engagements.
KOCHASOFT VP, CHIEF SAP SOLUTION LEAD 2019–2021	Built and scaled an SAP-on-Azure practice, growing revenue from \$1.5 million to \$5 million in one year, while directing multidisciplinary transformation teams.

Executive Perspective

I bring a practical, cross functional leadership perspective to technology-driven transformation: fluency in emerging technologies paired with an understanding of business priorities, operating realities, stakeholder expectations, and risk. That combination allows me to engage senior leaders on complex issues while keeping execution connected to measurable outcomes.

Leadership principle: *clarity in direction, discipline in execution, accountability in outcomes.*
